

EPG systems

WAGENINGEN, THE NETHERLANDS

Availability

Products Stock Information – July/August 2018

Products in Stock:

Giga-8dd device (2018 series)		24*
Silver glue	2ml vials	always
gold wire	Ø 12.5 µm	10
gold wire	Ø 18 µm	15
other items	on request (e-mail)	

Software *Stylet*⁺ for EPG data acquisition and analysis: *free download*

* This new 2018 series is expected to be in stock by the end of July / beginning of August. Its development took more time than foreseen. After the final prototype tests during the last weeks of June we hope to resume delivery EPG devices in July/August.

The Giga-8dd (digital-differential) device includes a number of innovative changes such as 1) standard **emf-switch**** , 2) differential probe input design for **EPG recording in the field**, and 3) **USB powering** by the computer USB port (no separate AC/DC power adaptor any longer). Field operation requires laptop powering independent from power grid (e.g. by a power box, or a 'cigarette lighter' device operating from a car battery). Also the differential amplifier input was a requirement for field recording without loosing normal lab use, resulting in slightly bigger probes than in the previous Giga-8d versions.

With a price of € 4625.00, this version is somewhat more expensive. There are no running quotations (valid proforma invoices; check 60 day period) are left and expired ones cannot be extended therefore on the same basis.

One disadvantage is that probes of older systems are incompatible with the new 2018 Giga-8dd.
